

NEW JUNIOR HIGH: The modern 20-room Junior High School shown in this artist's drawing is now well on into the planning stage. It will be located at Roch and Munroe in East Kildonan, with construction to be completed before the 1958 term opens, provided it is passed by the ratepayers. The main floor area of the school proper will feature a split-

level effect with home economics, kitchens, etc., and shops on the lower floor. Each of the two floors above will have six classrooms, a library and medical room. The glass-fronted section off the Munroe entrance accommodates office and teaching staff, with showers and changing room facilities provided for the large cement-floored gymnasium.
