

Munroe School 'Open House' Friday Night

BY ARN McEWEN

Tomorrow evening, Friday, there will be quite a few little people disappointed if their moms and pops don't show up at "Open House" at their new location known as Munroe School on Munroe ave. (just across from Polson School).

Starting at 8 p.m. there will be a program, including films with general interest, followed by a "let's-have-a-look-around" period which, by the way, should be most interesting to all you people who have waited so patiently for this school to open.

The six-room building is fully modern in the use of matching tile floors and pleasing wall color combinations, with scientifically designed desks for comfort and utility.

Chalk boards are easy on the eyes and are aided by softly diffused fluorescent lighting throughout.

Venetian blinds reflect light upwards in classes having a southern exposure. The even heat you experience in this building is created by a dust-free oil burning unit.

The exterior, buff stucco trimmed in green, makes this structure an asset to our community, held in high esteem by Miss McIntyre, principal, her staff and all the young pupils who up to a few days ago have had rather a rough time of it being crowded elsewhere.

We think all taxpayers will be proud too and we'd like you to drop in and see it for yourself tomorrow evening.
