

# GASOLINE STOCKS MENACED BY FIRE IN EAST KILDONAN

Fire, at times dangerously close to huge steel tanks storing thousands of gallons of gasoline, did damage estimated at about \$2000 to the equipment and control room on the premises of the Radio Oil and Refineries, limited, Munroe avenue and Watt street, East Kildonan, early Monday afternoon.

Origin of the blaze will be investigated today by provincial government fire inspectors.

Good work on the part of East Kil-

donan fire-fighters confined the blaze to the control room, although it appeared at times as if the flames would get sufficiently close to explode the gigantic tanks of gasoline.

The firemen remained on duty for nearly two hours.

The funeral of William Lawton, 62, who died Sunday at the General hospital, will be held this afternoon, at 2 o'clock, from the Clark-Leatherdale funeral home. Burial will be made in Elmwood cemetery.
