

New Building To House School Board Offices

The new building being erected on Roch street at the rear of the Munroe Junior High School will be the new home of the East Kildonan School Board office and Maintenance Department.

With the sale of the old Polson School property, the School Board was obliged to find other space for the Maintenance Department.

In addition, with the 12 new classrooms added to the Junior High School, and an increase in the number of teachers, more space is required in the teachers' room.

When the new building is completed the space occupied by the administrative staff of the Board will be changed back for use by the teachers.

The lower floor of the new building will be used by the maintenance staff as storage and a work shop. The top floor will be taken over by the administrative staff.
